Cast iron systems for rainwater, soil and drain

Tuscan Foundry Products has supplied cast iron rainwater goods for listed and period buildings since 1893. We work with architects, conservation officers, surveyors and specialist contractors on projects ranging from a single replacement hopper head to the complete rainwater system of a church or country house.

The standard gutters, pipes and fittings in this list are made to BS 460:2002 and are supplied primed or factory black, or finished in our own workshop in traditional linseed oil paint. Where a profile or casting is no longer made, we copy cast from a sample or a measured drawing.

We are supply-only. We do not install, but we are always glad to help with specification, profile identification and practical advice on site.

Technical & sales support

Profile identification, specification wording, take-offs from drawings and practical advice for heritage projects.

Site visits & surveys

Chargeable site surveys, including access by cherry picker, with a written schedule of what is needed. Part of the survey fee is credited against a subsequent supply order.

Copy casting

New patterns made from a sample or measured drawing for gutters, hopper heads, pipes and ornamental castings.

Linseed oil finishes

Traditional linseed oil paint applied by hand in our workshop, in 38 heritage colours or matched to a sample. See the colour chart in this list.

LINSEED OIL PAINT COLOURS

Heritage Paint Finishes for Cast Iron Rainwater Systems

Traditional linseed oil paint applied to cast iron guttering, pipes, and hoppers in factory conditions. Two primer coats of pure linseed red oxide are applied to prepared cast iron, followed by three top coats for outdoor installations. Each coat is allowed to dry for 48–72 hours depending on temperature and light conditions, and applied using natural bristle brushes.

38 historically accurate colours are available across seven colour families. Colours outside this range can be produced to order, including exact matches from an existing sample. A minimum quantity applies for bespoke colour orders.

Application Process

Surface preparation (wire brush or shot blast) → degreasing → two coats linseed red oxide primer (48–72 hours between coats, depending on temperature and light conditions) → three coats linseed oil topcoat (48–72 hours between coats, depending on temperature and light conditions)

Yellows & Ochres — 3 colours

Sandy yellows, golden ochres, and warm tans. Particularly sympathetic to sandstone and golden limestone settings, and to industrial heritage and rural estate buildings.

Greys & Stones — 9 colours

WHITES & CREAMS

Swatch	No.	Name	Character & Use
No.1	1	Project White	A pure, bright white with the characteristic warmth of linseed oil. Ideal for Georgian and Victorian cast iron where a crisp white is required without a cold, modern appearance. Highly suited to rendered and stucco-fronted town houses.
No.2	2	Cambridge No 7	A soft off-white with a subtle warm undertone. Widely specified for period townhouses, university buildings, and listed properties where a pure white would appear too stark against historic stone or brick.
No.3	3	Restoration White	A traditional restoration white with a slightly aged, antique quality. Reflects the slightly mellowed whites found on historic cast ironwork that has been well maintained and repainted over many decades.
No.4	4	Warwick's Bench	A warm, creamy white with more depth than a standard off-white. Suits oak-framed buildings, Jacobean properties, and estate buildings where a strong warmth in the paint is appropriate to the setting.
No.5	5	Whiteley	A mid-tone off-white with a distinctive chalky character. Sits between cream and stone, making it extremely versatile for both rendered and stone-faced period properties across a range of architectural periods.
No.10	10	Clotted Cream	A rich, warm cream particularly sympathetic to buildings in honey-coloured limestone areas. Conveys warmth and traditional craftsmanship without appearing overly yellow in direct sunlight.
No.13	13	Fairburn	A soft, biscuity stone colour. More golden than Clotted Cream, it reads as a pale stone rather than a cream and is well suited to late Victorian and Edwardian properties with red brick or terracotta details.

GREYS & STONES

Swatch	No.	Name	Character & Use
No.6	6	Warm Grey	A gentle warm-toned grey with a slight stone quality. Highly suitable for cast iron against Bath stone, Portland stone, or red brick elevations where a cooler grey would create an unwanted contrast.
No.7	7	Pearl Grey	A light, luminous grey with warm undertones. An excellent choice for cast iron rainwater goods where a lighter finish is needed against white or pale rendered facades on Georgian and Regency properties.
No.9	9	Quartz	A clean, mineral grey with a cool quality. Close in tone to the natural appearance of freshly cast iron, making it a highly authentic finish for conservation projects with strict accuracy requirements.
No.11	11	Haddon Estate Grey	A mid-tone grey of rich character. A versatile, authoritative grey that conveys permanence and quality, suitable across Victorian municipal buildings, country houses, and formal architectural settings.
No.12	12	Green Grey	A grey with a distinct green undertone, reminiscent of weathered lead and slate. Conservation officers frequently specify this colour for cast iron where a lead-like appearance is required without the use of actual lead.
No.14	14	Highfield Grey	A deeper, more neutral grey. A solid, confident choice that works well on heavy Victorian cast ironwork, industrial heritage buildings, and ecclesiastical properties where presence and weight are required.
No.25	25	Silver Grey	A cool, clear silver grey with a metallic quality. Reflects the natural tone of aged cast iron and is an ideal conservation-accurate choice for listed buildings in stone-built and urban settings.
No.36	36	Old Lead	Precisely formulated to replicate the appearance of aged lead rainwater goods. Highly specified for Listed Building Consent applications where cast iron is replacing lead and visual authenticity must be maintained for planning approval.
No.15	15	Medway, PA	A warm stone-grey. Sits between a warm grey and a stone tone, making it highly versatile across brick, stone, and render elevations from the Victorian period through to the early twentieth century.

No.19	19	Leaf Green	A fresh, pure green with good depth. Less grey than Echo or Moss, Leaf Green reads clearly as green and suits Victorian municipal buildings, country houses, and ecclesiastical settings.
No.20	20	Amsterdam Green	A deep, rich bottle green. Historically accurate for 19th-century ironwork. One of the most widely specified heritage greens for cast iron rainwater systems on period buildings across the UK.

2.4 Please ensure that any bespoke orders made by you clearly set out your requirements and accurate measurements. We cannot accept the return of any bespoke products if the reason for return is because you provided us with incorrect measurements or specifications. However, this will not affect your legal rights as a consumer in relation to bespoke Products that are faulty or not as described. Advice about your legal rights is available at your local Citizen's Advice Bureau or Trading Standards office.

2.5 Any bespoke Products ordered by you are outside our normal specification of Products and as such we may incur additional design, materials and manufacturing fees or costs. 2.6 Any bespoke pattern created by us, unless specifically requested by the customer at the time of order, remains the property of Tuscan Foundry Products.

2.7 For cast iron products specifically; casting is an imperfect process and the surface finish will never be completely smooth and free of blemishes. The beauty and aesthetic appeal of cast iron is in its imperfections. It is also possible that some castings may have small pinholes that will require on-site filling before installation. Please consider that this is a heritage product. Your product will though be manufactured to a high standard.

2.8 Paints & Finishes

Primer Finishes

Primer-finished gutters and pipes are supplied with one coat of protective grey primer. This primer will protect against corrosion during transportation and short-term undercover storage, providing a suitable surface for primer coating and final painting. On-site handling and painting are the responsibility of the contractor, and particular environmental considerations should be taken into account when choosing the paint system for the final finishing. We recommend that an additional priming coat be applied on-site, followed by 1 undercoat and 2 gloss coats of an alkyd paint system. All individual elements should receive the first of the gloss coats before fixing, and finished with the final gloss coat after the installation is complete.

Factory Paint Finishes

The black-painted products have an exterior coating, high solids, and a black gloss paint finish. High solids and a gloss finish ensure greater durability over lower solids and matt/satin finishes. The paint application is carried out in a controlled environment located on-site. All black-painted products arrive individually bagged for maximum protection and are ready for immediate installation. We also offer and recommend purchasing touch-up paint with all painted orders; this can be applied to installation scuffs, scratches or cut ends. This paint specification finish meets a C3 corrosion category environment.

Bespoke Paint Finishes

We can offer bespoke paint finishes using various types of paints, including bitumenised and linseed oil. However, it is the customer's responsibility to ensure the paint finish is suitable for the geographical and environmental location of the products they are using.

Coastal Paint Finishes

Coastal paint specification can be offered on all rainwater products and the Heritage Express (TX) soil system. Black painted or RAL and BS colours are also available to this specification.

Coastal and Marine environments are difficult to define; however, for guidance, they are estimated to be areas within 5km (approximately 3 miles) of the coast. Areas falling within a coastal or marine environment are classified as a C4 corrosion category.

The durability of paint systems is not an exact science; neither is the predictability of atmospheric conditions to which a product will be exposed. For this reason, we cannot be specific regarding the number of years the paint will last. To combat this aggressive environment, the overall coating thickness on the Coastal products is much greater. This increased coating thickness forms a longer-lasting barrier between the environment and the substrate thus delaying the onset of corrosion.

Galvanised Products

For galvanised components such as gutter and pipe brackets, the underlying steel will typically remain structurally sound for many years. However, it is important to note that paint adhesion to galvanised finishes can be problematic, with coatings often prone to flaking or peeling over time.

Where a decorative or protective finish is required, we generally recommend powder coating as this provides a more durable and long-lasting bond to the galvanised surface. If a suitable colour match can be achieved, powder coating offers the most reliable solution for maintaining both the appearance and the protection of galvanised brackets and fittings.

Aftercare

Regular aftercare of cast iron guttering and downpipes is essential to maximise service life and protect against corrosion. The paint finish provides the primary barrier against rust and must be kept in sound condition.

Inspection Frequency: Paint finishes should be inspected annually, and every six months in coastal or marine locations.

Immediate Action: Any signs of flaking paint or surface rust must be cleaned and addressed without delay to prevent further deterioration.

Expected Lifespan: Under typical conditions, paint finishes may last 5-7 years before recoating is required. However, this is dependent on factors such as location, exposure, and quality of application.

Additional Measures: In harsher environments (e.g., high humidity, salt-laden air), more frequent maintenance and recoating may be necessary. Use high-quality, weather-resistant, or marine-grade paints and consider supplementary anti-corrosion treatments for improved longevity.

8. YOUR CANCELLATION AND REFUND RIGHTS IF YOU ARE A CONSUMER

This clause 8 only applies if you are a consumer.

8.1 If you are a consumer, you have a legal right to cancel a Contract under the Consumer Contracts (Information, Cancellation and Additional Charges) Regulations 2013 during the period set out below in clause 8.3. This means that during the relevant period if you change your mind or decide for any other reason that you do not want to receive or keep a Product, you can notify us of your decision to cancel the Contract and receive a refund. Advice about your legal right to cancel the Contract is available from your local Citizens' Advice Bureau or Trading Standards office.

8.2 However, this cancellation right does not apply in the case of any bespoke, made-to-measure or custom-made products. Unfortunately, as bespoke products are made to your requirements, you will not be able to cancel your order once made (but this will not affect your legal rights as a consumer in relation to bespoke/made to measure Products that are faulty or not as described).

8.3 Your legal right to cancel a Contract starts from the date of the Order Confirmation (the date on which we e-mail you to confirm our acceptance of your order), which is when the Contract between us is formed. Your deadline for cancelling the Contract then depends on what you have ordered and how it is delivered, as set out below:

- Your Contract is for a single Product (which is not delivered in instalments on separate days): the end date is the end of 14 days after the day on which you receive the Product. Example: if we provide you with an Order Confirmation on 1 January and you receive the first instalment of your Product or the first of your separate Products on 10 January and the last instalment or last separate Product on 15 January you may cancel in respect of all instalments and any or all of the separate Products at any time between 1 January and the end of the day on 29 January.
- Your Contract is for either of the following: one Product which is delivered in instalments on separate days; multiple Products which are delivered on separate days: the end date is 14 days after the day on which you receive the last instalment of the Product or the last of the separate Products ordered. Example: if we provide you with an Order Confirmation on 1 January and you receive the first instalment of your Product or the first of your separate Products on 10 January and the last instalment or last separate Product on 15 January you may cancel in respect of all instalments and any or all of the separate Products at any time between 1 January and the end of the day on 29 January.
- Your Contract is for the regular delivery of a Product over a set period: the end date is 14 days after the day on which you receive the first delivery of the Products. Example: if we provide you with an Order Confirmation on 1 January in respect of Products to be delivered at regular intervals over a year and you receive the first delivery of your Product on 10 January, you may cancel at any time between 1 January and the end of the day on 24 January. 24 January is the last day of the cancellation period in respect of all Products to arrive during the year.

8.4 To cancel a Contract, you must contact us in writing by sending an e-mail to info@tuscanfoundry.co.uk or by sending a letter to Tuscan Foundry Products, Unit 1, Tyn-Y-Clyn, Llanafan Fawr, Builth Wells, Powys, LD2 3LU, United Kingdom. You may wish to keep a copy of your cancellation notification for your own records.

8.5 If you cancel your Contract we will: (a) refund you the price you paid for the Products. However, please note we are permitted by law to reduce your refund to reflect any reduction in the value of the goods, if this has been caused by your handling them in a way which would not be permitted in a shop. (b) refund any delivery costs you have paid, although, as permitted by law, the maximum refund will be the costs of delivery by the least expensive delivery method we offer (provided that this is a common and generally acceptable method). For example, if we offer delivery of a Product within 3-5 days at one cost but you choose to have the Product delivered within 24 hours at a higher cost, then we will only refund what you would have paid for the cheaper delivery option. (c) make any refunds due to you as soon as possible and in any event within the deadlines indicated below: (i) if you have received the Product and we have not offered to collect it from you: 14 days after the day on which we receive the Product back from you or, if earlier, the day on which you provide us with evidence that you have sent the Product back to us. For information about how to return a Product to us, see clause 8.8; (ii) if you have not received the Product or you have received it and we have offered to collect it from you: 14 days after you inform us of your decision to cancel the Contract.

8.6 If you have returned the Products to us under this clause 8 because they are faulty or mis-described, we will refund the price of a defective Product in full, any applicable delivery charges, and any reasonable costs you incur in returning the item to us.

8.7 We will refund you on the credit card or debit card used by you to pay. If you used vouchers to pay for the Product we may refund you in vouchers.

8.8 If a Product has been delivered to you before you decide to cancel your Contract: (a) then you must return it to us without undue delay and in any event not later than 14 days after the day on which you let us know that you wish to cancel the Contract. You can either send it back, return it to us in-store or hand it to our authorised carrier. Please see our Website for our returns address; (b) unless the Product is faulty or not as described, you will be responsible for the cost of returning the Products to us. If the Product is one which cannot be returned by post, we estimate that if you use the carrier which delivered the Product to you, these costs should not exceed the sums we charged you for delivery; Because you are a consumer, we are under a legal duty to supply Products that are in conformity with this Contract. As a consumer, you have legal rights in relation to Products that are faulty or not as described. These legal rights are not affected by your right of return and refund in this clause 8 or anything else in these Terms. (c) In the event that we accept your request to return a product, we reserve the right to charge 40% of the invoice total by way of a restocking charge.

9. YOUR CANCELLATION AND REFUND RIGHTS IF YOU ARE A BUSINESS

If you returned the Products to us because they were faulty or mis-described, please see clause 9.6.

10.8 If you do not wish to cancel your order straight away, or do not have the right to do so under clause 10.7, you can give us a new deadline for delivery, which must be reasonable, and you can cancel your Order if we do not meet the new deadline.

10.9 Please note that bespoke Products require additional work and so will not be delivered within the 30 day deadline, times for bespoke castings are normally in the region of 12 weeks from paid order. We will contact you with an estimated delivery date for any bespoke Products as soon as reasonably possible. Due to the nature of bespoke cast products delivery times are always only an estimate, as because of the nature of the process, casting will often require further work, alteration and adaptation, before they are ready for delivery.

10.10 If you do choose to cancel your Order for late delivery under clause 10.7 or clause 10.8, you can do so for just some of the Products or all of them, unless splitting them up would significantly reduce their value. If the Products have been delivered to you, you will have to return them to us or allow us to collect them, and we will pay the costs of this. After you cancel your Order we will refund any sums you have paid to us for the cancelled Products and their delivery.
